“COMPOGRO” COMPOST INFORMATION SHEET

Our **“COMPOGRO”** compost is manufactured from a controlled blend of biosolids, woody residues, leaves and other compatible organic wastes. These materials are composted under carefully controlled conditions to assure the highest quality product suitable for topsoil production, flowerbeds, lawn care, shrubbery, golf courses, parks, cemeteries, greenhouses, and nurseries. The compost is analyzed routinely and has the following nutrient contents:

Available Nutrients per Ton (1 yard of Compogro weighs 528 lbs.)														
Application Method:	N	P205	K20	Ca	Mg	S	Fe	Mn	Zn	Cu	B	Mo	Cl	Na
Broadcast	12.8	9.63	6.63	15.60	2.73	1.92	5.48	.70	.23	.10	.03	-	-	.76
Soil Incorporation	17.1	12.03	7.46	19.50	3.42	2.40	6.85	.87	.29	.12	.03	-	.76	
pH 5.27-5.32														
% dry 69.18														
Range of values based on the most recent analyses by NCDA&CS for FP # 47														

The production of COMPOGRO met all of the temperature requirements for pathogen destruction as required by EPA and the North Carolina Department of Environment and Natural Resources (NCDENR). The composting process has achieved temperatures of not less than 131 degrees Fahrenheit for three consecutive days, and has been tested for pathogen indicator organisms prior to public distribution. This product has been composted for at least 21 days and cured for more than 21 days to provide additional product quality. The heavy metal content of COMPOGRO is less than or equal to the metals limitations established by EPA and recognized by NCDENR for classification as exceptional quality biosolids. During the composting and curing process, this product met the EPA and NCDENR requirements for vector attraction reduction by achieving an average of 113 degrees Fahrenheit for at least 14 consecutive days. COMPOGRO is suitable for distribution to the public for a variety of agricultural, landscaping, and horticultural uses with the following restrictions:

1. COMPOGRO shall not be applied to land except in accordance with the instructions contained herein.
2. Do not ingest or allow others to ingest COMPOGRO. Wash hands after handling.
3. Third parties must be provided with COMPOGRO information sheet.
4. COMPOGRO shall not be applied to any site that is flooded, frozen, or snow covered.
5. COMPOGRO shall not be applied within 25 feet of any waterway, stream, river, or lake.
6. COMPOGRO shall not be applied within 100 feet of any wells or private or public water supply sources.
7. COMPOGRO stored for longer than 14 days must be covered.
8. Adequate precaution must be taken to prevent runoff of COMPOGRO during rainfall events
9. COMPOGRO should not be applied if it threatens any species listed under section 4 of the Endangered Species Act.
10. COMPOGRO shall not be applied to any area in the 100 Year Flood Elevation unless it is tilled in to the soil.
11. COMPOGRO shall not be applied to an area if there is less than 1-foot separation from the vertical water table.
12. COMPOGRO shall not be applied within 24 hrs of a rainfall event of 0.5 inches or greater.
13. COMPOGRO should be applied at agronomic rates or as recommended for intended use

The end user of this product is expected to use this product as described above. All state and federal regulations are intended for the protection of the public health and the environment.

Limited Warranty and Disclaimer: The City of Burlington warrants that the product, COMPOGRO, meets the specifications stated above. Except as stated in the preceding sentence, there are no warranties, express or implied, that extends beyond the representations herein made. Specifically, there are no warranties of merchantability or fitness or suitability thereof for any purpose. If for any reason COMPOGRO fails to meet the specifications, the Buyer’s sole remedy shall be limited to the recovery of the purchase price. Under no circumstances shall the City of Burlington be liable for any other damages, including direct, indirect, consequential or special damages.
